

Chilli Challenge Class 1  
Monday 11<sup>th</sup> January 2021

On Saturday afternoon, my family and I went for a walk in the snow near my house. The ground was frozen so we found lots of tracks. Here are some photos of those we found. Can you identify which animal left these tracks? I have included a link to the Woodland Trust website which provides more information...and some useful clues!

Maybe you have been outside for some exercise near your home and have found some tracks. Can you record them and tell me what animal they might be? I look forward to seeing your results!
