

## Class 1 Maths

Friday 22<sup>nd</sup> January 2021

Today we are ending our learning by looking at why we need to know about volume and capacity; to make a yummy fruit cocktail!

### **Counting using a number line**

Counting carefully and finding one less is tricky, so we are going to continue with that today. Use your number line to help again.

I'll start you off again: can you find one less than 9?

### **Learning activity**

Together follow the recipe to make the cocktail. If you can, encourage the children to use language of half full, full and empty. This is only a suggested recipe. Please feel free to use your favourite juices. I would love to see what combinations you come up with! (The BBC Good Food website has some nice ideas).

### Fruit cocktail recipe

**1 cup of orange juice**

**1 cup of apple juice**

**1 cup of grape juice**

**Grapes and orange to garnish**

### Method

**Pour 1 cup of orange juice into a jug. Add one cup of apple juice. Add one cup of grape juice. Stir well. Enjoy!**
