

## Properties of 2D Shapes

Create a spreadsheet using the following information.

### Circle

- 1 side
- 0 corners
- Infinity lines of symmetry

### Hexagon

- 6 sides
- 6 corners
- 6 lines of symmetry

### Heptagon

- 7 sides
- 7 corners
- 7 lines of symmetry

### Triangle

- 3 sides
- 3 corners
- 3 lines of symmetry

### Square

- 4 sides
- 4 corners
- 4 lines of symmetry

### Octagon

- 8 sides
- 8 corners
- 8 lines of symmetry

### Rectangle

- 4 sides
- 4 corners
- 2 lines of symmetry

### Nonagon

- 9 sides
- 9 corners
- 9 lines of symmetry

### Pentagon

- 5 sides
- 5 corners
- 5 lines of symmetry

### Decagon

- 10 sides
- 10 corners
- 10 lines of symmetry
