

Use the three definitions below to split the images of fossils into two categories: body fossils and trace fossils.

Challenge: Can you explain why you have put each fossil into the specific category?

Dino Dictionary

Organism

... a living thing or system, such as a vertebrate, insect, plant or bacterium.

Dino-Dictionary

Body fossil

...fossil made up on bones and body parts

Dino-Dictionary

Trace fossil

...fossil created by imprints or decayed fossils

Body fossil or trace fossil?
