

## Class 1 Maths

Monday 1<sup>st</sup> March 2021

Today we are recapping on counting back, initially within 10 but extending to within 20 if your child is confident.

**Warm up activity:** Start by counting to 20 together using a number line and then counting back again from 20 to 0. Point to the numbers on the number line as you do so.

**Learning activity:** Referring back to the number line discuss what happens as we count. What is happening to the numbers as we go up the line? What is happening as we go down?

Can you order these cards from 10 counting backwards to 1?

10	5	1	7	4
8	6	9	2	3

**Challenge:** As it is World Book Day on Thursday, we will be looking at books which support our learning. Share this fabulous book, "Cockatoos" by Quentin Blake..

<https://www.youtube.com/watch?v=i6UGlckZTKk>

Professor DuPont loses his 10 cockatoos. Can you spot them and count to 10 during the story?
