

Class 1 Maths

Friday 5th February 2021

Learning activity: Please watch the video. If you would like to join in you will need some paper plates....

Extension activity: part part whole models help us to see how we can make a number (the whole) by adding other numbers (the parts) together. Understanding this is useful when looking at reasoning and problems solving as well as helping with number bonds and general patterns in maths. If you would like to extend this further, try the attached game which asks you to estimate (a sensible guess!). This skill will be developed by a good understanding of what smaller numbers bigger numbers are made up of. Enjoy!

Play the number track game with a friend.

Roll 2 dice. How many spots do you have altogether?

Can you predict what number you will land on?

How many more spaces do you need to move in order to win the game?
