

## Class 1 Maths

Tuesday 2<sup>nd</sup> February 2021

### Warm up activity

#### Show me

Ask the children to show you numbers up to 10 on their fingers. Once they have shown you, ask them to tell you 1 less.

### Learning activity

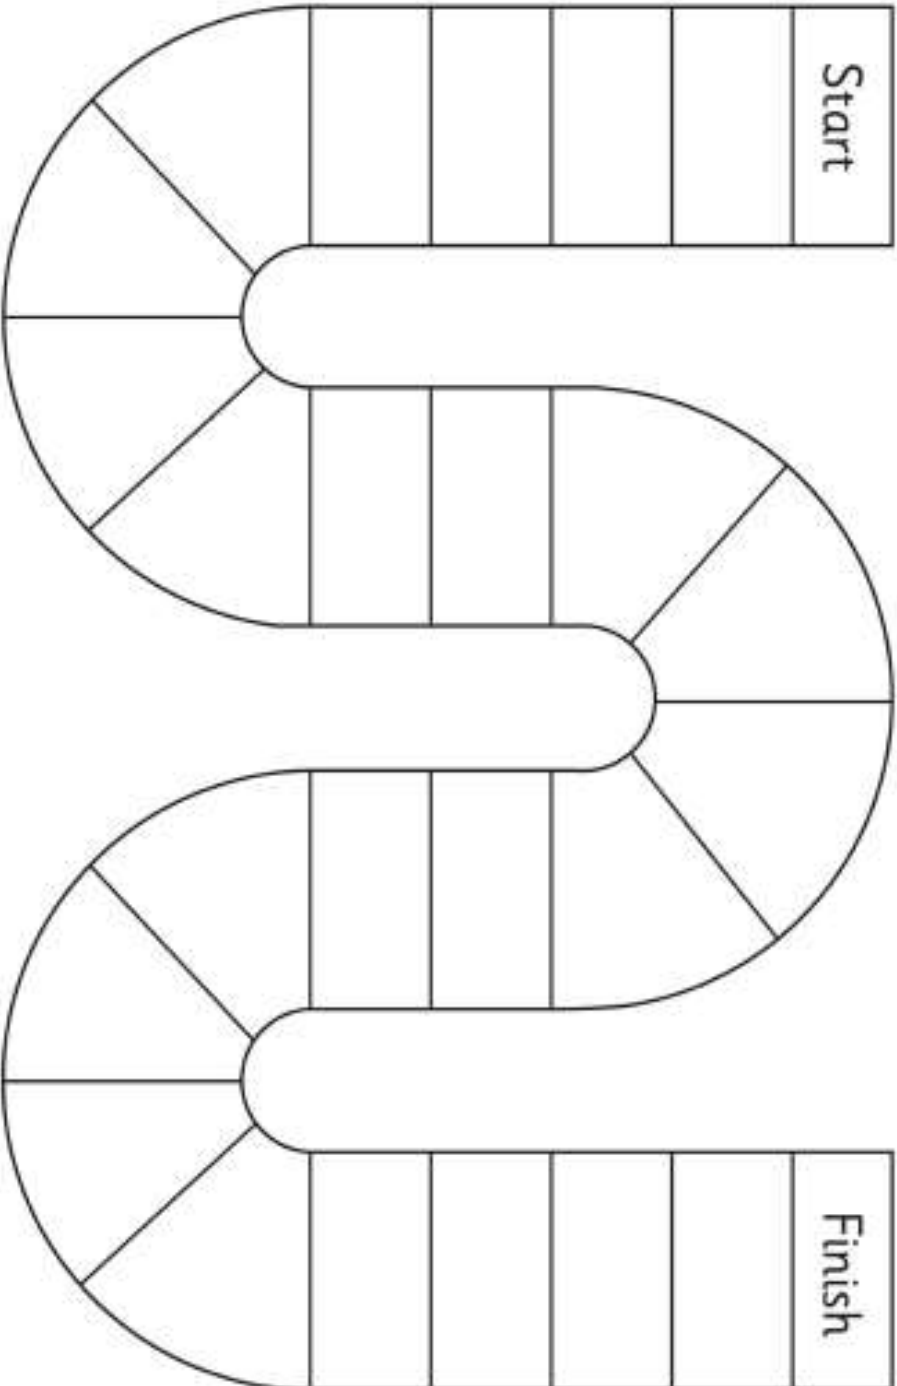

Today we are going to look at adding two numbers together using dice. Roll two dice. Ask the children how they will find out how many dots are on both the dice. (Can they tell you by counting them all)?

Together find out how many spots there are altogether by counting them all. Ask them to use the sentence "altogether I have ...". Give the children the two dice to use and ask them to roll the dice and talk about how many spots are on their dice altogether.

Encourage the children to talk about the numbers they have combined and what they have altogether.

**Learning through play:** adding two numbers using dice can be continued by playing board games where two dice are needed, for example snakes and ladders. You may want to play these at home or you could design your own game using the attached template. Let me know how you get on!
