

Computing Friday 5th January 2021

LO: I can add additional features to my programming.

It has been fantastic to see some of the examples of programming that you have done at home.

fmsLogo:

This week you are going to be looking at using the repeat sequences, that we learnt about last week, to create programming loops that draw a range of different shapes. The resources on the home learning page include the PowerPoint, the activity sheet and an extension sheet if you get finished quickly.

Scratch:

This week you are going to be moving on from the basic drawing programme that you hopefully had a go at last week. This week will investigate how we can add features to improve our programmes. The resources on the home learning page include the PowerPoint, the activity sheet and an extension sheet if you get finished quickly.
