This is an easy drawing tutorial meant for younger kids such as toddlers, preschoolers, kindergartners, etc. The form of the bird / robin that you are about to draw is based completely on simple shapes. Enjoy.

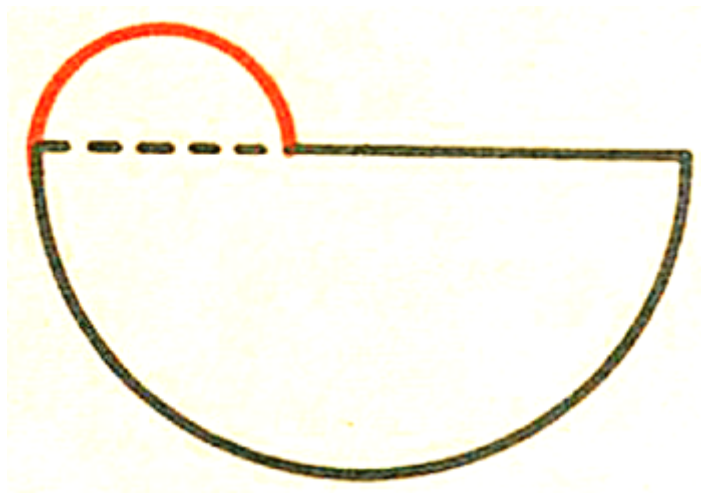

Step 1

First, draw a half of a circle and a line.

Step 2

Now add another circle and erase dotted line.

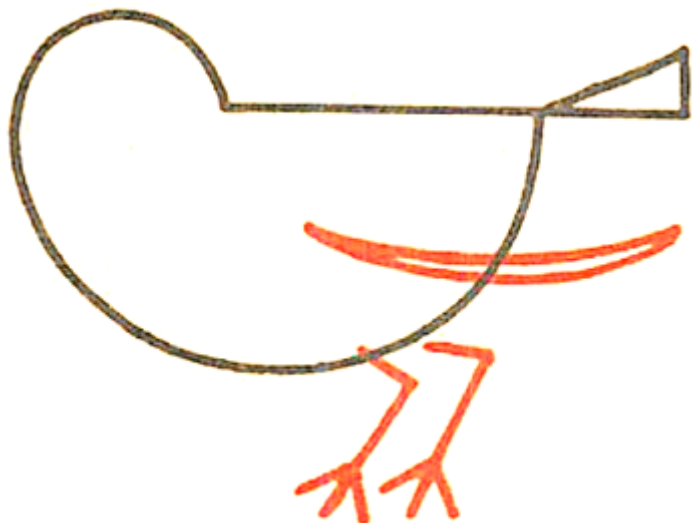

Step 3

Now add a triangle for the bird's tail.

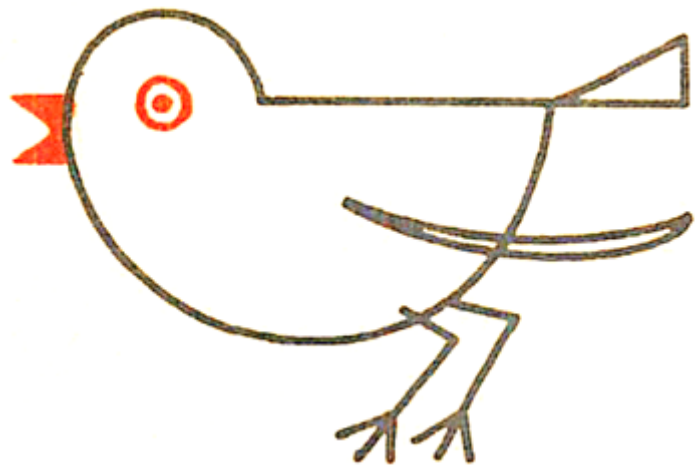

Step 4

Now give the robin a wing and two feet. Notice that the feet look like a number '7' with an upside down letter 'v' on the bottom.

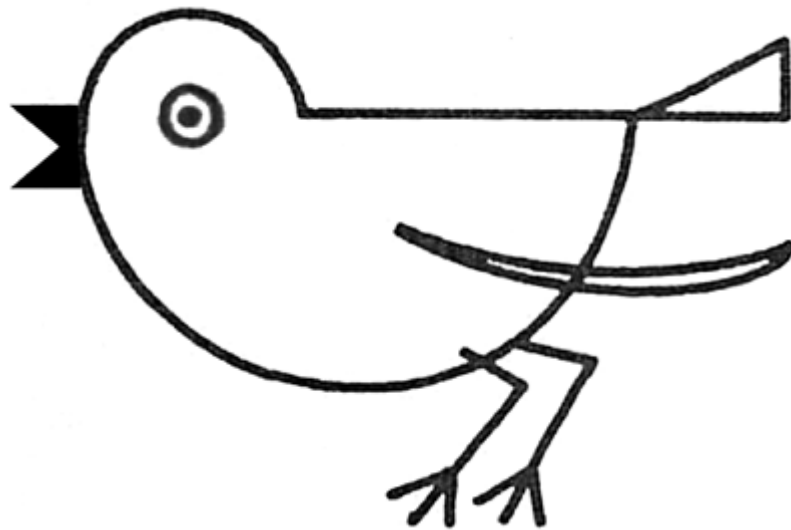

Step 5

Now add an eye by drawing a circle with another circle around it. Also, add two triangles for the beak.

Step 6 – Finished Drawing of a Bird – Easy Enough for Toddlers to Draw
