

Class 1 Theme (Growing)

Tuesday 2nd March 2021

Now that we have had the first glimpses of Spring we are going to get outside and start work on the Class 1 garden!

When everyone is back in school next week we are going to start by planting our own bean seed and watching it grow, recording our observations in our own Bean Diary.

To start us on the topic, please share this video with your children

<https://www.bbc.co.uk/programmes/p00pyhfg>

Discuss with them: what does the seed need to grow? What do the roots of the plant help to do? What part of the plant grows towards the light?
