

## **Class 1 Theme (Growing)**

**Wednesday 3<sup>rd</sup> March 2021**

So only three more days of home-schooling for you Class 1. I am so very excited to finally welcome you all into school. One of the things I have most been looking forward to is getting outside and starting to create and develop our very own Class 1 garden. Although I have lots of ideas of what we could do and what we could grow, I very much want it to be your space, full of your ideas and interests.

Therefore, this afternoon I would like you to think about what you might like to grow in our garden space. Remind yourself about what it looks like with my video and then get to work. Should we grow flowers or vegetables? Remember that not all fruits and vegetables can grow outdoors in this country so you may need to talk to a grown up about your ideas. Bees and butterflies are very important for the environment; should we try and attract them? How about some water? Although we don't have space for a pond to be housed safely, could we make a pond in a pot to attract dragon flies and grow water plants? Mini beast huts are also available. How about a log pile house?

Below is a very rough outline of the space (can you tell me what 2D shape it is?). Use this or feel free to come up with your own design. I can't wait to see what ideas you have on the Class Dojo!

Happy planning!
